

XRY LOGICAL

A FAST, EFFICIENT AND SECURE METHOD TO EXTRACT MOBILE PHONE DATA

XRY Logical is our entry level software product for a Windows based PC, complete with the necessary hardware for forensic investigations of mobile devices. XRY is the standard in mobile device forensics and the first choice among law enforcement agencies worldwide.

XRY Logical software enables investigators to perform 'Logical' data acquisition. This forensic process is used to communicate with, and read the contents of, the device; which typically generates live information.

RECOVER LIVE MOBILE DATA

SECURE XRY FILE FORMAT

3 SIMULTANEOUS EXTRACTIONS

MSAB

FAST, EFFICIENT & SECURE

XRY Logical provides a intuitive and user friendly interface to analyze a wide range of mobile phones through a secure examination process to recover data in a forensically secure manner. The information gathered from the examined device is instantly available for review in a secure and traceable manner, ensuring its legal standing and credibility in a court of law.

The software's user interface is simple to navigate, with a wizard designed to help guide you through the entire process from start to finish so you can immediately start to recover data with confidence.

OUR ENTRY LEVEL SOLUTION

With XRY, a tamper-proof report is created within minutes which can easily be customized to a user's needs, including references and a user's own organization branding as required. The Case File functionality allows for several different examinations to be held together in a folder. For example the logical extraction of the device along with reads from the SIM Card and SD memory storage. Our software is tested on every device we support and fully documented. With XRY's unique 'Device Manual' help file, investigators know exactly what information to expect from a device and just as importantly what you should not expect to recover. With the freedom to run on most Windows based computers; our results are always available immediately for review to ensure fast and efficient reporting.

SPECIFICATIONS

PC requirements: Intel 1.6 GHz dual-core, 2GB RAM, 2 USB-ports

Operating system requirements: Windows 7, 8 or 10 (64Bit only)

Display requirements: 1366 x 768 resolution minimum

Additional Requirements: Microsoft .NET Framework 4.5

Packaged weight: 4.5 kg (9.9. lbs) approx
