

RAC 3D SSP

If you are thinking about the protection of Your information ...

The information about an organization's status and capability to protect their vital information is important from a business view and is a key condition for the quality and success in management decisions.

The RAC ISMS C-Audit is a quick and effective way to verify an organization's status towards ISO/IEC 27001:2005 and ISO/IEC 27002:2005 basic requirements and through this obtain the basic view of securing the organization's information in their processing of the information and communication systems.

The RAC ISMS C-Audit provides the organizations (without consideration to their size, business segment or their method of information protection) with a general overview on how to begin and then improve the information security management system of the organization on a base of the international standards and recommendations.

„Not knowing“ is necessity to making decisions with unknown „risks“
„Knowing“ is an option in making „right“ decisions based on reality

Reasons for C-Audit

Many reasons, from a business aspect, exist for using C-Audit:

- ◆ The organization has never solved the information security problems systematically but it wants to begin to cover it
- ◆ The organization has implemented many information security protections, but it doesn't know if all areas are covered
- ◆ The organization wants to be assured by a third party that its implemented ISMS is in conformance with the proper standards and recommendations

Standards and recommendations in C-Audit

ISO/IEC 27001:2005 Information security management system

The recommendations and steps for the implementation and using of ISMS in never ending cycle of improvement

ISO/IEC 27002:2005 Code of practice for information security management

The best practices library for information protection in all important areas

BSI BIP 0072 Are you ready for an ISMS audit based on ISO/IEC 27001?

The verification of ISMS through implemented processes and countermeasures

Advantages of C-Audit

The main contribution of C-Audit for assessed organizations is:

- ◆ using the proof and widely accepted Information Security standards and recommendations (with optional direct delivery)
- ◆ the speed of delivery doesn't usually exceed one business day
- ◆ increasing the awareness of all participating organization's employees
- ◆ the realization by very experienced and informed consultants
- ◆ prompt availability of output reports about organization's ISMS status

Scenario of C-Audit

The realization of C-Audit is in the workshop form which contains the next steps:

- ◆ **Intro Presentation** provides the basic overview about ISMS, the aim, purpose, preparation, implementation and using, as well as certification
- ◆ **Input Preparation** obtains the filling in under professional leadership and collection of appropriate surveys from the organization's employees
- ◆ **Status Analysis** makes analysis and assessment of the organization ISMS status including appropriate reports
- ◆ **Final Presentation** provides the summary of content and outputs about the ISMS status of organization
